

Hrishikesh R

LinkedIn: <https://www.linkedin.com/in/hrishikeshr->
GitHub: <https://github.com/hrishi1314>

Email: imhrishi46@gmail.com
Mobile: +91 7904163216

SKILLS

Languages: C++, Python, C, Java, SQL, HTML, CSS, JavaScript
Frameworks: Pandas, NumPy, Scikit-Learn, Matplotlib, Seaborn
Tools/Platforms: MongoDB, MySQL, PostgreSQL, Git/GitHub, VS Code, Vercel/Render
Soft Skills: Team work & Collaboration, Communication, Problem-solving

PROJECTS

Library Management System | [GitHub](#) Jun' 26

- Implemented the core system engine in LibrarySystem.java, handling major operations including book/member management, catalog search, book issue and return, fine calculation, member history, and leaderboard generation.
- Designed and implemented the priority-based waiting queue with automatic book allocation, ensuring returned books are issued to the next eligible member in the queue while integrating the system's **Queue, Stack, and Priority Queue data structures**.
- Applied **Java, Object-Oriented Programming, Data Structures, algorithmic problem-solving, and modular application development**, including time-complexity analysis for core library operations.

Tech Stack: Java, Data Structures, Git/GitHub

AI Appliance Recommender Chatbot | [GitHub](#) Apr' 26

- Contributed to the development of an AI-powered washing machine recommendation chatbot**, implementing recommendation logic based on user requirements including **budget, family size, machine type, and load type**.
- Implemented data preprocessing, filtering, duplicate removal, and weighted product ranking** using Python and Pandas, while integrating **LLM APIs** with Groq and an Ollama fallback to generate personalized product comparisons and buying guidance.
- Gained **Built an interactive Streamlit application** integrating **Generative AI, API integration, and recommendation-system logic**, gaining practical experience in prompt engineering, LLM integration, data processing, and user-focused application development.

Tech Stack: Python, Streamlit, Scikit-learn, Pandas, Git/GitHub

TRAINING

Lovely Professional University Jun' 26 – Jul' 26
Data Structures and Algorithms

- Strengthened proficiency in **Java, Data Structures, and Object-Oriented Programming** through hands-on implementation of Queue, Stack, Priority Queue, and other core DSA concepts. Applied **algorithmic problem-solving and time-complexity analysis** while developing modular Java applications.
- Developed a Java Swing-based Library Management System using Object-Oriented Programming and custom data structures, applying algorithmic problem-solving and time-complexity analysis to implement book management, issue/return operations, waiting lists, and borrowing history.

CERTIFICATES

Database Management System | [Infosys](#) Jul' 26
Data Structures and Algorithms | [Neocolab](#) Jan' 26
Introduction to AI & ML | [Skillera](#) Jan' 25
MongoDB | [GeeksForGeeks](#) Nov' 24
Python | [Hackerrank](#) Nov' 24

EDUCATION

Lovely Professional University Phagwara, Punjab
Bachelor of Technology Aug' 24 – Present
Computer Science and Engineering; CGPA: 8.69

Velammal Bodhi Campus Coimbatore, Tamil Nadu
CBSE | Class XII | Percentage: 88% Apr' 23 – Mar' 24

Brilliant Vidya Bhavan Coimbatore, Tamil Nadu
CBSE | Class X | Percentage: 89% Apr' 21 – Mar' 22
